HEADWATERS BEFORE

Protect-A-Cote Inc. successfully completed the Headwaters Trail Project for the Portage Park District, transforming a muddy, overgrown trail into a high-quality recreational asset for the community.

protect-a-cote.com

ross@protect-a-cote.com

The project included approximately 1.4 miles of new walking path, a parking area, restrooms, and upgraded road-crossing features. The work required significant site improvements, including managing water drainage into nearby streams and constructing a completely new trail through the existing brush and terrain.

IN PROGRESS

HEADWATERS AFTER

The finished project transformed the area into a beautiful, functional, and accessible community trail.

THANK
YOU.
