

Caledonia
ELEMENTARY SCHOOL

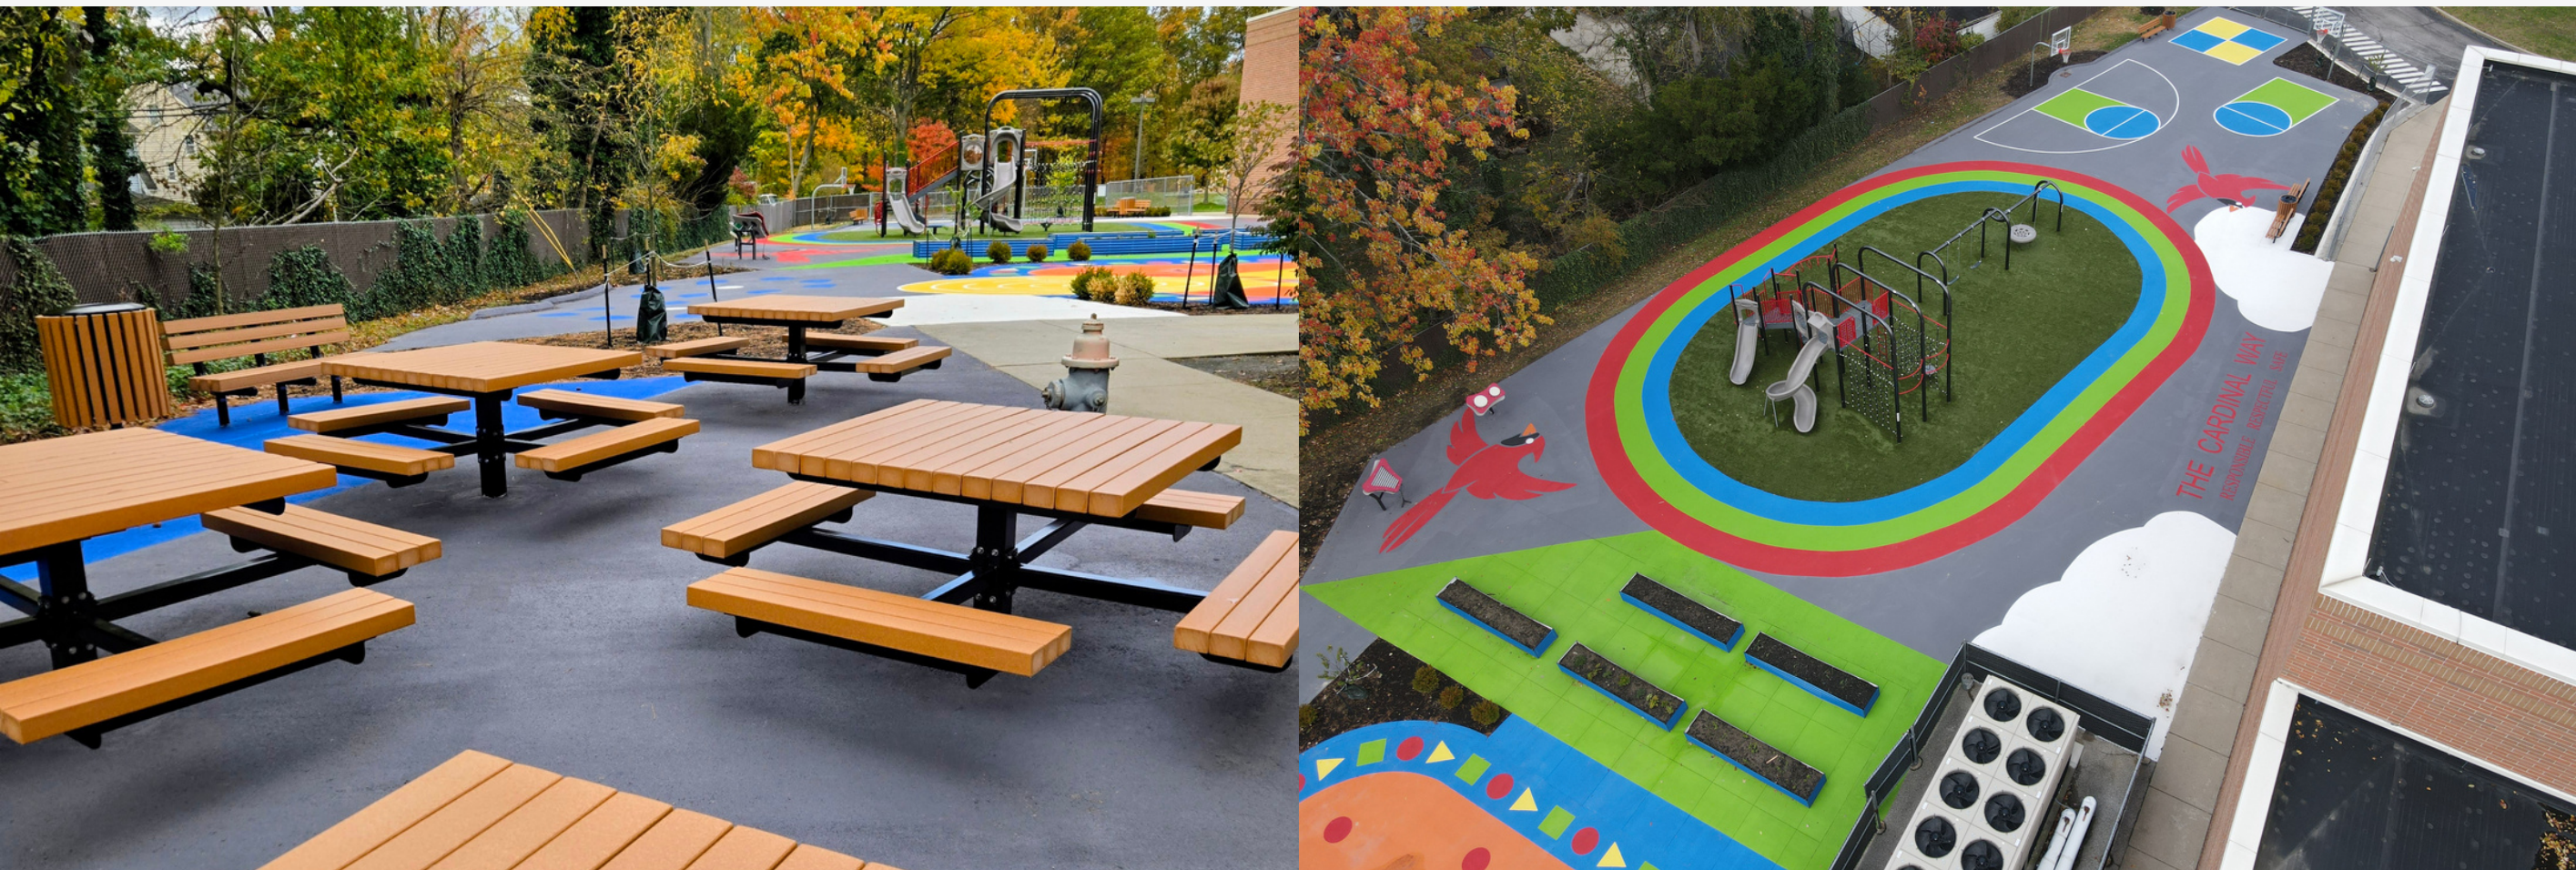

Caledonia Before

This project was made possible through collaboration with **Behnke Landscape Architects** and **Trust For Public Land** to develop Northeast Ohio's first community schoolyard for the East Cleveland City School District.

These photos, taken from Google Maps and Street View, show the area before construction began.

The photos used here show the creative play and picnic areas, connected by asphalt walkways to the sports courts and playground.

Caledonia After

The contract for Caledonia Elementary School was awarded to Protect-A-Cote, Inc. in 2025 and at the time was the largest awarded contract in company history at \$766,000.00

Caledonia Before

This project included thousands of feet of solid 6-inch under drain to make an outdoor play area complete with learning and play areas connected by asphalt walkways.

These photos, taken from Google Maps and Street View, show the area before construction began.

The asphalt walkways were constructed with ADA compliance in mind, to seamlessly connect the two play areas together.

Caledonia After

The photos used here show the outdoor playground as well as the asphalt walk ways that connect to the sports court and creative play area.

thank you
